Fax: (217) 355-2508

Patient Information

Client: Probst, Kristine

Patient Name: RUGER GOEBEL

Reg. Name: RUGER GOEBEL

PennHIP Num: 172688

Species: Canine

Date of Birth: 18 May 2018

Sex: Male

Date of Study: 27 Apr 2022

Date of Report: 02 May 2022

Tattoo Num:

Patient ID: 38145

Registration Num: S505904403

Microchip Num:

Breed: GOLDEN RETRIEVER

Age: 47 months

Weight: 63.1 lbs/28.6 kgs

Date Submitted: 27 Apr 2022

Findings

Distraction Index (DI): Right DI = 0.25, Left DI = 0.32.

Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**

Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.32.

OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 23790 canine patients of the GOLDEN RETRIEVER breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.32 - 0.79) for the breed. The breed average DI is 0.53 (solid square). The patient DI is the solid circle (0.32).

SUMMARY: The degree of laxity (DI = 0.32) ranks the hip within the tightest 5% of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
